EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with W. Thad Adams III on October 21, 2005.

2. The application has been amended as follows: In claim 2, Line 27 , the second occurrence of the word, "return", has been deleted.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: None of the prior art discloses or renders as obvious a plurality of springs positioned in a radial opposition to one another and the biasing force of the return member providing an assist to the motion of the stem in the upstream direction in addition to the other elements of structure claimed. Funderburk discloses a plurality of springs positioned in a radial opposition to one another (Figure 3), but does not disclose the biasing force of the return member providing an assist to the motion of the stem in the upstream direction. Boy does not disclose a plurality of springs pivotally mounted positioned in a

radial opposition to one another (Figure 1). Modifying Boy to have a pivotally mounted plurality of springs would cause the valve to never return to the seat.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
